

Your customers want to do business with ethical companies.

 **56%** percent of surveyed supply chain executives said that they were concerned or very concerned about data security and IT incidents.

 **73%** of companies who use unlicensed software are more likely to be the victim of theft of confidential data.

Using Properly licensed software is critical

The Verafirm Registered Advantage

Global recognition given to all qualified Verafirm companies in recognition of their commitment to strong IT governance.

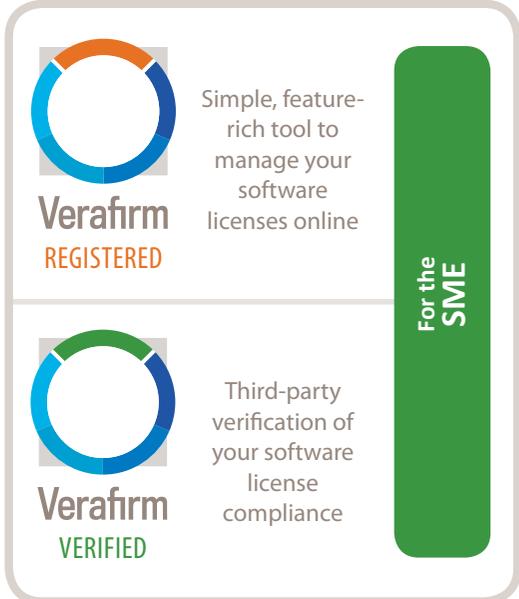

Intuitive interface with features such as software balance sheets, license expiration alerts and interactive visual dashboards makes monitoring and maintaining software inventory hassle free.

User-friendly tool makes registration easy. Users can clarify questions they may have through our easily accessible customer support.

World-class software asset management is now at your fingertips.

Verafirm offers a simple, feature-rich tool to manage your licenses and help grow your business.

Verafirm
REGISTERED

Simple, feature-rich tool to manage your software licenses online

Verafirm
VERIFIED

Third-party verification of your software license compliance

For the SME

Companies using licensed software are viewed as safe, fair and trusted business partners.

Earn global recognition

Organizations that achieve Verafirm Registered declare they use properly licensed software and automatically qualify to become part of the global list of Verafirm companies - an increasingly important reference point for customers in integrated supply chains.

Why should you Register on Verafirm?

Registering with Verafirm helps you avoid risks associated with unauthorized software while providing you with a SAM tool to help you track what is in your system, optimize software to your business needs and eliminate unnecessary spending.

Why take the next step to Verification?

After you register, verification gives you the additional confidence that only an independent assessment of your software license inventory can provide.
